EDUCATION

St. Cloud State University

St. Cloud, MN

B.S.E. in Software Engineering

Graduated 2026

Coursework: Data Structures, Operating Systems, Database Systems, Software Design, Software Quality, Software Reverse Engineering, Human Computer Interaction

EXPERIENCE

Software Engineer Intern, Cluster Software

September 2026 - Present

New York, NY (Remote)

- Contributed to Cluster's platform connecting agents to 50+ GTM data sources (LinkedIn, Apollo, Crunchbase, HubSpot, etc.) for automated prospecting, enrichment, and outreach.
- Worked on infrastructure supporting agent orchestration and integrations at a fast-growing, YC-backed startup building next-gen sales automation tools.

Software Engineer Intern, refine. (Refine Technology, Inc.)

June 2025 - August 2025

New York, NY (Remote)

- Contributed to the development of an AI-powered search platform.
- Built backend services and APIs using Go, PostgreSQL, and gRPC.
- Developed frontend components with React and TailwindCSS.
- Pushed multiple features to production and participated in sprint planning and code reviews.
- Coded and deployed an internal tool to help development with LLMs.
- Worked with CI/CD pipelines and cloud infrastructure; handled QA testing, debugging, and technical documentation.

Music Director, Sound Engineer, and On-Air Host, KVSC 88.1 FM

May 2023 - Present

St. Cloud, MN

- Managed daily station rotation and KVEX 97.5 FM (HD2) programming; kept catalog metadata current in MusicMaster.
- Reviewed and categorized incoming releases and maintained communication with labels, distributors, and promo contacts.
- One of the primary mixing and mastering engineers for Monday Night Live; edited live studio recordings in Pro Tools for Bandcamp release and operated the on-air board during tapings.
- Provided live sound reinforcement for concerts, campus events, and remote broadcasts under tight show timelines.
- Created and hosted The Moshpit, a weekly metal show, and produced the recurring review program Crispy Critics.

Audio Visual Technician, Mount Olivet Lutheran Church

August 2026 - Present

Minneapolis, MN

- Mixed live audio for vocals, instruments, and speakers across Sunday services, weddings, and funerals.
- Produced and directed multi-camera livestream broadcasts, managing camera switching, graphics, and stream stability in real time.

PROJECTS

PEAK Health Nepal web platform (senior project), peakhealthnepal.org | React, PostgreSQL, Node.js

Fall 2025 - Spring 2026

- Web platform for an ICU unit in Nepal supporting fundraising, medical education, and staff administration.
- Implemented administrative controls so staff can manage content and oversee donations.

Long Distance Thought Journal | React, Node.js, MongoDB, Netlify, Render

Summer 2025

- Daily thought and mood portal for long-distance couples, with MongoDB storage and a Netlify and Render deployment.

KVSC Spotify Playlist Generator | Python, Streamlit, Spotify API

Summer 2024

- Builds Spotify playlists from the weekly KVSC Top 30 chart via scraping and the Spotify API, plus an audio-feature correlation matrix.

Minecraft Farlands Speedrun Tracker | PHP, MySQL

Fall 2024

- Assisted with database design, schema creation, and the tracking features of farlands.cc.

SKILLS

Languages: Go, Python, TypeScript, JavaScript, C++, Java, SQL, HTML, CSS

Frameworks and data: React, Next.js, Node.js, Express, FastAPI, TailwindCSS, gRPC, PostgreSQL, MongoDB, Redis, ClickHouse, Qdrant, Prisma, Docker, Kubernetes, Pandas, NumPy

Tools: Git, GitHub, GitLab CI/CD, Linear, Vercel, Netlify, Pro Tools, Adobe Audition, Adobe Premiere Pro, MusicMaster

Spoken languages: English, French (bilingual)
